

COVID-19: FAST FACTS

YourHealthFreedom.org

IS ASYMPTOMATIC SPREAD A THREAT?

Have you ever felt like we're going overboard with all of these measures?

Your instinct is correct: In a study of nearly 10 million people in China, only 300 asymptomatic cases of SARS-CoV-2 were found. Of those 300, NO cases of COVID-19 were detected. In addition, 1,174 close contacts of the 300 were traced, and all tested NEGATIVE for COVID-19.

"The 300 asymptomatic patients and their contacts were placed in isolation for 2 weeks. After the fortnight, the results remained the same." NO new cases of COVID-19 were found among any of the participants. (lifesitenews.com)

HOW CAN YOU AVOID COVID-19 COMPLICATIONS?

1. PREVENTION is the #1 DEFENSE against illness. Good nutrition, hydration, rest, and sunshine are CRITICAL. If you are high risk (obese, have high blood pressure, or have a vitamin D deficiency), seek medical intervention.
2. A virus is best treated EARLY. Research high dose vitamin C, vitamin D, vitamin A, and zinc for use upon FIRST onset of symptoms. DO NOT WAIT until symptoms become severe.
3. AVOID early intubation. Little known fact: Between 80-90% of those placed on ventilators died.
4. "HCQ has been shown to be safe, and have consistent clinical efficacy for COVID-19 when it is provided early in the outpatient setting."
- National Center for Biotechnology Information

WHAT IS THE COVID-19 VACCINE?

COVID-19 mRNA "vaccines" are not in fact actual vaccines. They are genetic modifiers. Once you've done it, you can't go back.

SHOULD COVID-19 VACCINES BE REQUIRED "FOR THE GREATER GOOD"?

NO medical intervention should ever be mandated or required. For every medical procedure there should be INFORMED CONSENT.

- "Informed" means the individual must be provided with ALL information on possible benefits AND drawbacks of the intervention.
- "Consent" means the individual has the option to decline without any form of penalty or retribution.

WHO IS LIABLE FOR COVID-19 VACCINE INJURY?

As of Jan 2019, the Vaccine Injury Compensation Program has paid out 4 BILLION DOLLARS for injuries proven in court to be causally associated with vaccines. How did this come to be?

In 1986, in response to an overwhelming number of lawsuits over injuries proven to be caused by the DPT vaccine, the National Childhood Vaccine Injury Act was signed into law. This removed ALL LIABILITY from manufacturers for injury caused by vaccines.

The Vaccine Court was created for the litigation of vaccine injury claims, and the Vaccine Injury Compensation Program was formed. Payouts are made from taxes on vaccines.

The Vaccine Court DOES NOT APPLY TO COVID-19 VACCINE INJURY. Manufacturer protection from liability for COVID-19 vaccines EXCEEDS EVEN THAT OF THE NCVIA. There is effectively NO RECOURSE if you are injured by a COVID-19 vaccine.
