

Date _____

Dear President _____,

I understand that I am being asked to submit SARS-CoV-2 mRNA injection, and that, if I refuse, my activities in the mission field will be limited.

Before I proceed, I have some questions for you. Please respond in writing.

1. Can you provide me with a list of the ingredients in the shot you would like me to receive? (If so, please include the list with your response.)
2. Can you certify that the injection did not, at any stage in its development, use aborted human fetal tissue. (If it did, using it violates my personal religious beliefs, which are protected by federal statute.)
3. Are you aware that these substances are certified for Emergency Use only, and that EUA approval comes with specific legal ramifications? Do you understand those ramifications?
4. Are you aware that these substances will not qualify for FDA approval for almost two years? (Pfizer: January 27, 2023; Moderna: December 2023)
5. Are you personally, or is the Church of Jesus Christ of Latter-day Saints, willing to accept liability for any injury (or death) temporally or causally associated with receipt of the injection?

Please provide written answers to questions 1-5 and notarize. Thank you.
